TECHNICAL EXPERTISE

Languages & Frameworks: Python, JavaScript, TypeScript, R, HTML5, CSS3, React.js, Node.js, FastAPI
Data & ML: Machine Learning, NLP Models, LLM, RAG, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Data Visualization, Jupyter Notebook, Prompt Engineering
Databases & Cloud: PostgreSQL, MySQL, DynamoDB, pgvector, AWS, Azure, GCP, Apache Spark, Hadoop, Kafka, HDFS
Tools & Other: Git/GitHub, Docker, REST APIs, ETL Pipelines, MapReduce, Excel, SharePoint, AI Assistants, Streamlit, React

EXPERIENCE

- Data Intake Specialist** Nov 2025 – Present
Cencora Vilnius, Lithuania
 - Maintained efficient systems ensuring timely and accurate information flow to clients, handling intake of all program-specific correspondence (mail and electronic documents).
 - Logged and updated data in relevant databases with high accuracy; ensured compliance with all policies, procedures, and regulatory requirements.
 - Coordinated sharing of program-specific information with internal teams using Microsoft Teams and SharePoint to support seamless cross-functional workflows.
- Data Science with AI/ML Intern** Jul 2025 – Oct 2025
Labmentix Remote
 - Applied supervised and unsupervised ML algorithms for real-world predictive modeling; built and evaluated models with strong emphasis on performance metrics and cross-validation.
 - Used Python, Pandas, NumPy, and Scikit-learn for end-to-end data preprocessing, feature engineering, and model optimization across multiple datasets.
 - Created compelling data visualizations using Matplotlib and Seaborn to communicate insights to technical and non-technical stakeholders.
- Software Engineer Intern (IT)** Jul 2025 – Sep 2025
Yara International Delhi, India
 - Developed an AI-powered document assistant using FastAPI, PostgreSQL (pgvector), and NLP models, improving document summarization efficiency by **25%**.
 - Built and deployed a full-stack AI web application with React frontend and multiple integrated AI assistants, reducing application latency by **20%**.
 - Streamlined debugging and CI/CD deployment pipelines using Git/GitHub, cutting release cycle time by **15%** while maintaining high code quality standards.
- Big Data Engineer Intern** Jan 2024 – Feb 2024
Accenture Baltics Vilnius, Lithuania
 - Worked with AWS, Azure, and GCP to architect scalable data engineering solutions and cloud-based processing pipelines.
 - Built robust ETL pipelines using Python, SQL, and Apache Spark to process large-scale datasets; implemented NoSQL solutions (DynamoDB) for flexible analytics.
 - Gained hands-on experience with Hadoop, HDFS, MapReduce, and Kafka for distributed data handling and real-time streaming workflows.

PROJECTS

- AI-Powered Document Assistant & Summarizer** | *FastAPI, NLP, PostgreSQL, Python*
 - Designed AI-based assistant using NLP and FastAPI to process and summarize **200+ pages in under 5 minutes**, boosting productivity with concise and accurate outputs.
 - Implemented text preprocessing, summarization algorithms, and REST APIs for seamless third-party integration.
- Multi-Agent Simulator Web Application** | *React, FastAPI, PostgreSQL, NLP*
 - Built a scalable web app where AI assistants collaborate to perform complex tasks, improving task execution efficiency by **30%**.
 - Designed an intuitive React frontend for real-time monitoring of agent activity and results with live performance dashboards.
- Smart Retail Analytics Platform** | *Streamlit, Python, PostgreSQL, Plotly, Pandas*
 - Developed an AI-powered retail analytics dashboard enabling interactive insights on sales, customers, and inventory using customer segmentation (RFM & K-Means) and demand forecasting.
 - Implemented predictive analytics for business decision support and designed data visualizations using Plotly and Pandas.

EDUCATION

Vilnius Gediminas Technical University (VILNIUS TECH) <i>Bachelor of Science in Information Technology</i> – Relevant Coursework: Data Structures & Algorithms, Big Data Analytics, Business Analytics, Cloud Computing, Software Engineering, Database Systems – Active member of the university’s IT and tech communities; applying academic knowledge in real-world internships and projects throughout the degree.	Sep 2022 – Jul 2026 <i>Vilnius, Lithuania</i>
Apeejay Stya Education (Svran Foundation) <i>High School Diploma – Science (Physics, Chemistry, Mathematics, Computer Science)</i>	Apr 2021 <i>India</i>

LICENSES & CERTIFICATIONS

Cloud & Data Engineering: AWS Certified Data Engineer Associate (DEA-C01) Cert Prep | AWS Certified Machine Learning Specialty (MLS-C01) Cert Prep

Data Science & Analytics: Data Science Foundations: Fundamentals | Learning Data Analytics: 1 Foundations | Data Analysis: Investigate with SQL | SQL for Data Analysis | Advanced Data Visualizations: 12 Uncommon Plot Types

AI & ML: Guided Lab: Model Context Protocol (MCP) for Data Science Models | Microsoft Copilot: The Art of Prompt Writing

Tools & Management: Advanced Python in Excel: Data Analysis and Visualization | Project Management Foundations

LANGUAGES

English: Full Professional Proficiency **Hindi:** Native **German:** Intermediate (B1) **Lithuanian:** Elementary
